A-River-Runs-Again-Reporting-on-India's-Natural-Crisis--and-Its-Surprising-Solutions
Meera Subramanian's A River Runs Again tells five tales of India at the crossroads – a filigree of cautionary and celebratory stories – voiced with dignified passion. Elemental mistakes have been made – her concerns are mostly environmental, with one glaring exception – mistakes she has broken down into chapters entitled Earth, Water, Fire, Air, and Ether.

For India, it is the very real present.In this lyrical exploration of life, loss, and survival, Meera Subramanian travels in search of the ordinary people and microenterprises determined to revive India's ravaged natural world: an engineer-turned-farmer brings organic food to Indian plates villagers resuscitate a river run dry cook stove designers persist on the quest for a smokeless fire ...

Around the world, people are increasingly facing a future that is crowded and hot, thirsty or drowning, subject to violent weather extremes and a changing climate, where the rich and poor inhabit separate spheres and governments are unable or unwilling to confront the most vital challenges their citizens face. For India, this reality is the very tangible present. In this lyrical exploration of life, loss and survival, Meera Subramanian travels in search of the ordinary people and micro-enterprises that are determined to revive India's ravaged natural world. An engineer-turned-farmer brings organic food to Indian plates. Villagers resuscitate a river that had run dry. Cook stove designers persist in their quest for smokeless fire. Biologists bring vultures back from the brink of extinction. A bold young Bihari woman teaches young adolescents the fundamentals of sexual health. Through an investigation of these five crises, Subramanian finds renewed hope for a nation that has the potential to create a sustainable and prosperous future - for itself, the Earth and all her inhabitants.

A superpower of two billion people, a dozen new nations from Kerala to the Himalayas, artificial intelligences, climate-change induced drought, water wars, strange new genders, genetically improved children that age at half the rate of baseline humanity, and a population where males outnumber females four to one. This is India in 2047, one hundred years after its birth. In the new nation of Bharat, in the face of the failure of the monsoon, nine lives are swept together — a gangster, a cop, his wife, a politician, a stand-up comic, a set designer, a journalist, a scientist, and a dropout — to decide the future of Mother India. River of Gods teems with the life of a country choked with peoples and cultures — one and a half billion people, twelve semi-independent nations, nine million gods. A war is fought, a love is betrayed, a mystery from a different world decoded, as the great river Ganges flows on. Praise for River of Gods: "[A] bold, brave look at India on the eve of its centennial, 41 years from now...McDonald takes his readers from India's darkest depths to its most opulent heights, from rioting mobs and the devastated poor to high-level politicians and lavish parties. He handles his complex plot with flair and confidence and deftly shows how technological advances and social changes have subtly changed lives. RIVER OF GODS is a major achievement from a writer who is becoming one of the best sf novelists of our time." —Washington Post "[P]erhaps his most accomplished novel to date...reminiscent of William Gibson in full-throttle cultural-immersion mode, packed with technical jargon, religious and sociological observation and allusions to art both high and low... RIVER OF GODS amply rewards careful consideration and more than delivers its share of straight-ahead entertainment. Already a multiple-award nominee following its British publication, McDonald's latest ranks as one of the best science fiction novels published in the United States this year." —San Francisco Chronicle "A staggering achievement, brilliantly imagined and endlessly surprising ... A brave, brilliant and wonderful novel." —Christopher Priest, The Guardian

The National Book Award-winning novel about one remarkable young woman who dares to defy fate, perfect for readers who enjoyed A Long Walk to Water by Linda Sue Park or Inside Out and Back Again by Thanhha Lai. This middle grade novel is an excellent choice for tween readers in grades 5 to 6, especially during homeschooling. It's a fun way to keep your child entertained and engaged while not in the classroom. Like many girls her age in India, thirteen-year-old Koly faces her arranged marriage with hope and courage. But Koly's story takes a terrible turn when in the wake of the ceremony, she discovers she's been horribly misled—her life has been sold for a dowry. Can she forge her own future, even in the face of time-worn tradition? Perfect for schools and classrooms, this universally acclaimed, bestselling, and award-winning novel by master of historical fiction Gloria Whelan is a gripping tale of hope that will transport readers of all ages.

India is killing the Ganges, and the Ganges in turn is killing India. The waterway that has nourished more people than any on earth for three millennia is now so polluted with sewage and toxic waste that it has become a menace to human and animal health. Victor Mallet traces the holy river from source to mouth, and from ancient times to the present day, to find that the battle to rescue what is arguably the world's most important river is far from lost. As one Hindu sage told the author in Rishikesh on the banks of the upper Ganges (known to Hindus as the goddess Ganga): "If Ganga dies, India dies. If Ganga thrives, India thrives. The lives of 500 million people is no small thing." Drawing on four years of first-hand reporting and detailed historical and scientific research, Mallet delves into the religious, historical, and biological mysteries of the Ganges, and explains how Hindus can simultaneously revere and abuse their national river. Starting at the Himalayan glacier where the Ganges emerges pure and cold from an icy cave known as the "Cow's Mouth" and ending in the tiger-infested mangrove swamps of the Bay of Bengal, Mallet encounters everyone from the naked holy men who worship the river, to the engineers who divert its waters for irrigation, the scientists who study its bacteria, and Narendra Modi, the Hindu nationalist prime minister, who says he wants to save India's mother-river for posterity. Can they succeed in saving the river from catastrophe - or is it too late?

A monumental biography of the subcontinent from the award-winning author of The World Is What It Is: The Authorized Biography of V. S. Naipaul. Second only to China in the magnitude of its economic miracle and second to none in its potential to shape the new century, India is fast undergoing one of the most momentous transformations the world has ever seen. In this dazzlingly panoramic book, Patrick French chronicles that epic change, telling human stories to explain a larger national narrative. Melding on-the-ground reports with a deep knowledge of history, French exposes the cultural foundations of India's political, economic and social complexities. He reveals how a nation identified with some of the most wretched poverty on earth has simultaneously developed an envied culture of entrepreneurship (here are stories like that of C. K. Ranganathan, who trudged the streets of Cuddalore in the 1980s selling sample packets of shampoo and now employs more than one thousand people). And even more remarkably, French shows how, despite the ancient and persistent traditions of caste, as well as a mind-boggling number of ethnicities and languages, India has nevertheless managed to cohere, evolving into the world's largest democracy, largely fulfilling Jawaharlal Nehru's dream of a secular liberal order. French's inquiry goes to the heart of all the puzzlesments that modern India presents: Is this country actually rich or poor? Why has its Muslim population, the second largest on earth, resisted radicalization to such a considerable extent? Why do so many children of Indians who have succeeded in the West want to return "home," despite never having lived in India? Will India become a natural ally of the West, a geopolitical counterweight to the illiberal rising powers China and Russia? To find the answers, French seeks out an astonishing range of characters: from Maoist revolutionaries to Mafia dons, from chained quarry laborers to self-made billionaires. And he delves into the personal lives of the political elite, including the Italian-born Sonia Gandhi, one of the most powerful women in the world. With a familiarity and insight few Westerners could approach, Patrick French provides a vital corrective to the many outdated notions about a uniquely dynamic and consequential nation. His India is a thrilling revelation.

Reforming Urban Transport in India is an attempt to take stock of the various issues our cities and towns are facing in the area of urban transport, efforts made and being made both at the policy level as well as the field level to address the problems, the ever increasing complexities of challenges in the area of urban mobility and some of the laudable initiatives on the ground to handle the problems. This book would be a valuable addition to the limited literature available on the subject of urban transport in India. The topic has not attained much prominence even in the broader discussions on the transport sector issues in the country. The fact that we address our urban transport issues in a casual manner but there is need to take them up in a focused and purposeful manner and this can no longer be delayed is probably the one loud message which is emerging out of this volume. The wealth of knowledge of the contributors, each one of them having huge experience behind them in this sector, makes the book a valuable addition to the literature and a helpful guide in policy discussions.

"A novel about a forty-eight-year-old woman, Shyama, whose decision to use a surrogate mother from India in order to have a child with her younger boyfriend causes her life to intersect with Mala's, a young girl trapped in an oppressive marriage in a rural village in India who dreams of escape"--

With imaginative lushness and narrative elan, Mehta provides a novel that combines Indian storytelling with thoroughly modern perceptions into the nature of love--love both carnal and sublime, treacherous and redeeming. "Conveys a world that is spiritual, foreign, and entirely accessible."--Vanity Fair. Reading tour.

A sweeping, interdisciplinary history of the world's third-largest river, a potent symbol across South Asia and the Hindu diaspora Originating in the Himalayas and flowing into the Bay of Bengal, the Ganges is India's most important and sacred river. In this unprecedented work, historian Sudipta Sen tells the story of the Ganges, from the communities that arose on its banks to the merchants that navigated its waters, and the way it came to occupy center stage in the history and culture of the subcontinent. Sen begins his chronicle in prehistoric India, tracing the river's first settlers, its myths of origin in the Hindu tradition, and its significance during the ascendancy of popular Buddhism. In the following centuries, Indian empires, Central Asian regimes, European merchants, the British Empire, and the Indian nation-state all shaped the identity and ecology of the river. Weaving together geography, environmental politics, and religious history, Sen offers in this lavishly illustrated volume a remarkable portrait of one of the world's largest and most densely populated river basins.
