Understanding the dynamics of the illiberal practices of liberal states is increasingly important in Europe today. This book examines the changing relationship between immigration, citizenship and integration at the European and national arenas. It studies some of the main effects and questions the comprehensiveness of the exchange and coordination of public responses to the inclusion of third country nationals in Europe, as well as their compatibility with a common European immigration policy driven by a rights-based approach and the respect of the principles of fair and equal treatment of third country nationals. The volume reviews key national experiences of immigration and citizenship laws, the use of integration and the 'moving of ideas' between national arenas. The framing of integration in immigration and citizenship law and the ways in which policy convergence is being achieved through the EU framework on integration raises a number of conceptual dilemmas and a set of definitional premises in need of reflection and consideration.

This book shows how formal, non-formal, and informal education play important roles in the shaping of bilingual minds. The contributions gathered here examine how societies influence language education, taking into account different perspectives, as well as foreign language education in schools, native bilingualism, and societal stances towards bilingualism.

This is one of the few books to effectively blend together research, theory and practical pedagogy and link this directly with the context of teaching English to adults. There are reflective tasks throughout, which encourage you to develop and apply your theoretical knowledge to your own experiences.

What is required to achieve civic integration and citizenship in nation states across the world? Should language testing be a part of it? This book addresses the urgent need to develop a fuller conceptual and theoretical basis for language testing than is currently available, to enable widespread discussion of this theme and the concomitant linguistic and cultural requirements. The policy proposals for civic integration have so far been conducted almost entirely at a national level, and with little regard for the experiences of a countries with long traditions of migration, such as the USA, Canada, the UK or Australia. At the same time, EU enlargement and the ongoing rise in the rate of migration into and across Europe suggest that these issues will continue to grow in importance. This book raises the level of discussion to take account of international developments and to promote a more coherent and soundly based debate. It will appeal to researchers and academics working in sociolinguistics and language education, as well as those working on language policy.
