The Barnabas Factors: Eight Essential Practices of Church Planting Team Members, by author and professor J. D. Payne, describes how Barnabas should be considered as a model for contemporary church planting team members. Each chapter of this work addresses a particular "Barnabas Factor," a healthy aspect of Barnabas' life that assisted in Kingdom expansion. The eight practices include: Walks with the Lord Maintains an Outstanding Character Serves the Local Church Remains Faithful to the Call Shares the Gospel Regularly Raises Up Leaders Encourages with Speech and Actions Responds Appropriately to Conflict. The book also includes the Barnabas Factors Standard of Excellence Guide for Team Development to assist leaders in assessing potential team members. What others are saying about The Barnabas Factors: This is a very straightforward, non-glitzy look at what the Bible has to say about team ministry in church planting. Ed Stetzer, author of Planting Missional Churches, taken from the Foreword Given the risky and pioneering nature of church planting, it is essential to develop healthy relationships amongst members of the founding team. Here J. D. Payne gives us a biblical model of engendering healthy team dynamics by looking to the life and ministry of Barnabas. This is a book for those of us who want to keep a joyful camaraderie whilst advancing the kingdom. Alan Hirsch, author of The Forgotten Ways and The Shaping of Things to Come Founding director of Shapevine.com If there is a priority need today in church planting, it is a need for the church planting team members first to be people of exemplary Christ-like character. ... Payne's book addresses this issue in a clear and concise manner. R. Bruce Carlton, author of Acts 29, Professor of Cross-Cultural Ministry, Oklahoma Baptist University The Barnabas Factors: Eight Essential Practices of Church Planting Team Members is a unique and much needed book for anyone interested in church planting. I strongly believe it is a must-read for newly appointed missionaries and just as essential for veteran missionaries. This book powerfully sets forth the need for godly personal characteristics that are vital for successful church planting teams. The diagnostic tool at the conclusion of the book will be a great help in evaluating potential team members. Charles Brock, President, Church Growth International/author of Indigenous Church Planting: A Practical Journey I highly recommend this book. From end to end it is practical: it's the relationship stuff, the personal qualities of team members, and the realistic nuts and bolts of ministry that are so ultimately determinative to fruitfulness in the church planting and team contexts. Payne brings great clarity as to what is a missionary "call." And for no extra charge there is a powerful tool at the end pulling all the principles together to help you decide who to take onto your team and who not to. A must-read for all church planters. Daniel Sinclair, author of A Vision of the Possible: Pioneer Church Planting in Teams

Instead of a One-Size-Fits-All Approach, Evangelism: A Biblical Response to Today's Questions provides the reader with healthy and clear parameters for sharing one's faith that can be applied differing cultural contexts in today's globalized world.

Church planting is not just about gathering new communities of people who are already Christians. Planting churches flows naturally out of making disciples. In this concise guide, pastor J. D. Payne explains the process and stages of church planting, with biblical foundations and practical steps for planting teams both domestically and internationally.

In this addition to the highly acclaimed Encountering Mission series, two leading missionary scholars offer an up-to-date discussion of missionary strategy that is designed for a global audience. The authors focus on the biblical, missiological, historical, cultural, and practical issues that inform and guide the development of an effective missions strategy. The book includes all the features that have made other series volumes useful classroom tools, such as figures, sidebars, and case studies. Students of global or domestic mission work and mission practitioners will value this new resource.

J. D. Payne explores the biblical, historical and missiological principles of global church planting, and suggests ways that readers can apply international church planting practices to their own contexts.

In our changing world how do Christians come together in non-traditional ways? An expert takes a look at some of the most significant gospel-advancing movements and trends to take place in the latter twentieth and twenty-first centuries in the United States. New Christian groups examined include: the Church Growth Movement, Missional Church Movement, Multisite Movement, the rise of church planting networks, the House Church Movement, and the Emerging Church Movement. Readers are introduced to each expression, along with important definitions, history, convictions, and influential leaders. Features include: A close look at non-denominational movements that reach new people for Christ Explanations of how contemporary Christianity is changing Concise guide to non-traditional Christian groups

Not a one-size-fits-all approach, this book provides the reader with healthy and clear parameters for sharing faith applicable to differing cultural contexts in today's world.

More than ever, North America is being flooded by people from all around the world, many of them here illegally. How should the church respond to these sojourners among us? In Strangers Next Door professor of evangelism and church planting J. D. Payne introduces the phenomenon of migrations of peoples to Western nations and explores how the church should respond in light of the mission of God. As we understand and embrace the fact that the least-reached people groups now reside in (and continue to migrate to) Western countries, churches have unprecedented opportunities to freely share the gospel with them. This book includes practical guidelines for doing crosscultural missions and developing a global strategy of mission. It also highlights examples of churches and organizations attempting to reach, partner with, and send migrants to minister to their people. Discover how you can reach out to the strangers next door by welcoming them into God's family.

The first comprehensive textbook on effective church planting from a veteran church planter. The Apostle Paul was a veteran church planter who "laid a foundation like a wise and master builder" and there is much we can learn from his example. Paul indicated that there were basic skills and experiences required to successfully plant a church. Church Plantology examines the wide variety of church planting methods and ideologies in contemporary pastoral practice and outlines a biblical model based on the New Testament. During his time in prison, Paul spent much of his time writing to Titus, Timothy, and others who'd served alongside him in the trenches to complete their training as church plantings. We can continue to apply these time-tested, proven methods, following the pioneering example of the early church. Today, the casualty rate in is high. What if we could reduce the odds of failing? Church Plantology by Peyton Jones is a robust guide to planting that will help planters to provide the foundation necessary to survive beyond the initial first years so that they don't end up a walking statistic.

Written by 21st-century field workers, scholars and church leaders, this sixteen-chapter ebook supplement to Discovering the Mission of God explores the mission of God as presented in the Bible, expressed throughout church history and in cutting-edge best practices being used around the world today.
