Biofloc Technology A Practical Guide Book Intro - YouTube

Biofloc technology (BFT) is as an environmentally friendly aquaculture technique based on in situ microorganism production. Fish and shrimp are grown in an intensive way (minimum of 300 g of biomass per square meter [7]) with zero or minimum water exchange.

Biofloc Technology (BFT): A Tool for Water Quality ...

Biofloc system is a technology in which the materials which are harmful and poisonous to the fish or shrimp are transformed into some protein food. This is basically used in aqua farming when the density of stocking is high with very less exchange of water. This method would be run productively when the tanks used are kept in direct sunlight.

Biofloc Technology Aquaculture System Information | Agri ...

Biofloc technology brings an obvious advantage of minimizing consumption and release of water, recycling in situ nutrients and organic matter. Furthermore, pathogens introduction is reduced, improving the farm biosecurity. Biofloc technology will enable aquaculture grow towards an environmental friendly approach.

Biofloc Technology (BFT): A Review for Aquaculture ...

The environmental friendly aquaculture system called “Biofloc Technology (BFT)” is considered as an efficient alternative system since nutrients could be continuously recycled and reused. The sustainable approach of such system is based on growth of microorganism in the culture medium, benefited by the minimum or zero water exchange.

Biofloc Technology (BFT): A Review for Aquaculture ...

The World Aquaculture Society is an international non-profit organization with over 3,000 members in about 100 countries. Founded in 1969, the primary focus of WAS is to strengthen and facilitate communication and information exchange on high priority topics and emerging issues within the diverse global aquaculture community.
