This one day course is designed to build confidence with your close quarter manoeuvring. With a maximum of 4 participants, you will cover various aspects of berthing and unberthing, including the use of springs, shorthanded mooring, Mediterranean mooring, effective use and preparation of your crew. We will include with your course fee the RYA Boat Handling under Sail and Power book.

## ~~Boat Handling under Power Course | Nomad Sailing~~

These one and two-day courses are aimed primarily at extending skills in handling sailing yachts under power in the marina. At crew request there may be time to include handling under sail in close quarters manoeuvres. For most people the area that is of greatest concern is simply getting the yacht into and out of a marina without fuss or drama. Add some wind, perhaps a cross tide at a lock entrance, a tight berth and a few spectators and many skippers begin to feel under pressure.

So let's take a step back and revisit some basic boat handling techniques. Leaving a pontoon or berth. Coming away from a pontoon is a relatively simple manoeuvre. If the route ahead is clear and there is no wind or stream, then for small boats a good push off the pontoon and driving away forward can do the trick.

~~Read Download Boat Handling Under Sail And Power PDF—PDF ...~~

Boat designer Harrison Butler was "a strong believer in the 'metacentric shelf formula' to achieve good balance and handling under sail. The theory held that as a yacht heels under sail, its balance will depend on the immersed form of the hull, with different sections exerting varying degrees of buoyancy and aft sections possibly being more buoyant than forward sections.
