Cellular Respiration—An Overview

What are the phases of cellular respiration? Why? All cells need energy all the time, and their primary source of energy is ATP. The methods cells use to make ATP vary depending on the

Download File PDF Cellular Respiration An Overview

availability of oxygen and their biological make-up. In many cases the cells are in an oxygen-rich environment.

and then release waste products.

The reactions involved in respiration are catabolic reactions, which break large molecules into smaller ones, releasing energy in the process.
