Exploring the Language of Drama introduces students to the stylistic analysis of drama. Written in an engaging and accessible style, the contributors use techniques of language analysis, particularly from discourse analysis, cognitive linguistics and pragmatics, to explore the language of plays. The contributors demonstrate the validity of analysing the text of a play, as opposed to focusing on performance. Divided into four broad, yet interconnecting groups, the chapters: * open

up some of the basic mechanisms of conversation and show how they are used in dramatic dialogue * look at how discourse analysis and pragmatic theories can be used to help us understand characterization in dialogue * consider some of the cognitive patterns underlying dramatic discourse * focus on the notion of speech as action. there is also a chapter on how to analyse an extract from a play and write up an assignment.

Language and World Creation in Poems and Other Texts introduces an interdisciplinary and practical approach to the analysis of poetry which focuses on text worlds, namely the contexts, scenarios or types of reality that readers construct in their interaction with the language of texts. The book demonstrates in detail three ways of approaching poetic text worlds, namely as discourse situations, possible worlds, and mental constructs. Clear and detailed introductions to linguistic theories of definiteness and deixis, possible world theory and schema theory are included, making the book accessible to readers who are unfamiliar with these frameworks.

Children's writer and poet Amy Ludwig VanDerwater leads us on an adventure through poetry, pointing out craft elements along the way that students can use to improve all their writing, from idea finding to language play. "Poems wake us up, keep us company, and remind us that our world is big and small," Amy explains. "And, too, poems teach us how to write. Anything." This is a practical book designed for every classroom teacher. Each lesson exploration includes three poems, one by a contemporary adult poet and two by students in grades 2 through 8, which serve as models to illustrate how poetry teaches writers to: find ideas, choose perspective and point of view, structure texts, play with language, craft beginnings and endings, choose titles. Students will learn how to replicate the craft techniques found in poetry to strengthen all writing, from fiction to opinion, from personal narrative to information. "Poets arrange words and phrases just as prose writers do, simply in tighter spaces," Amy argues. "In the tight space of poetry, readers can identify writing techniques after reading one page, not thirty pages."
