Ford Cougar The Ford Cougar was a large coupe from Ford Motor Company between 1998 and 2002. It was sold in the Europe, Australia and USA. In the USA it was sold under the Mercury marque, named as Mercury Cougar. Initially Ford intended to sell it as a third generation Ford Probe, but later offered it as a new model.

This book chronicles the reconstruction of a 1967 Mustang Coupe. The Coupe started as a plain, low value coupe. Time, gravity, weather, and use eventually caught up with the Coupe and it needed a serious make-over. The Coupe was converted from its existing 289 cubic inch, carbureted motor to a 5.0 fuel injected engine. At the same time, it was converted from an automatic to manual transmission (T-5) with overdrive. The reconstruction took 7 years (working on a part-time basis). Information is provided for reference only.

For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.
