Some of the more commonly used  
data structures include lists,  
arrays, stacks, queues, heaps,  
trees and graphs. The way in  
which the data is organized affects  
the performance of a program for  
different tasks. Data structures are  
generally based on the ability of a

PREFACE derived. The growth of data base systems has put a new requirement on data structures courses, namely to cover the organization of large files. Also, many instructors like to treat sorting and searching because of the richness of its examples of data structures and its practical application.
