Well, these are all products of the human mind. The creator of the universe endowed humans with an exceptional gift which, when well-harnessed, enables us to think and solve problems. How well we use this gift of the mind is the subject matter of this book written by Mawuli Dzitse. In relatively few pages, the author establishes the important role the mind plays in our lives. Any manipulation of the mind has a telling effect on who we are and what we become. The mind is like an independent variable; the state of the dependent variable revolves around it. So what happens when the mind is in a doubtful state? A doubtful mind does not necessarily have to result in negative developments. In fact, doubt generates creativity. When used in moderation, doubt can be a welcoming asset in the society. It is a mover for social change. Nevertheless, doubt can be pathological if it is not managed properly. It is the prevention of negative aspects of doubt that the author focuses in this book. The underlying tone of the book posits that every human being has the capacity to use their mind to produce outcomes that can improve the quality of life than the one they came to meet. Mawuli provides answers to questions aimed at enhancing individual outlook on life as well as strategies for making the mind clean, healthy and functional. In other words, how individuals should nurse and nurture their mind food, which he identifies as information and messages. He advises readers to avoid
