After selecting JavaServer Faces, various configuration options become available. Under the Libraries tab, you can specify how the project accesses JSF 2.0 libraries. The default option is to

File Type PDF

Javasever

use the libraries included with the server (the GlassFish server). However, the IDE also bundles the JSF 2.0 libraries.

Faces Implementation
of MVC. The JSF
Lifecycle. The Faces

File Type PDF

Javasever

Controller servlet serves as the link between the user and the JSF application. It operates within the confines of a well defined JSF Lifecycle which dictates the entire flow of events between user requests. For example, upon an initial Web request to access a JSF

File Type PDF

Javaserver

application, the Faces controller servlet handles the request by first preparing the JSF context, which is a Java object that holds all application data.
