JavaServer Pages (JSP) allow for dynamic and flexible web development. JSP technology allows Web developers to cross-platform Web applications, and can be used to create interactive sites, such as a bank site which allows customers real-time account balances and transaction information. This is a reference book for JSP, it covers a wide range of topics to help develop powerful JSP pages ...

The "Virtual Trainer Application" sample (which is the only one complete and real) does not show the Full power of JSF 2.0. I mean I can implement the same application by using JSP 2.1 or with Struts 2.0, or with SpringMVC -- any MVC capable framework can do the same job with almost the same effort. So why should I use JSF?

Amazon.com: Customer reviews: JavaServer Faces 2.0, The ...

For Version 7.0 nodes, the JSF implementation is an application configuration setting. For Version 9.0 and later nodes, the Sun Reference 1.2 JSF implementation is not supported. Instead, use the MyFaces JSF implementation. Alternatively, you can use an isolated shared library, as described for third-party JSF implementations.

Configuring for JavaServer Faces 2.2 - IBM

Version 2.0 of the JSP specification added support for the Expression Language (EL), used to access data and functions in Java objects. In JSP 2.1, it was folded into the Unified Expression Language, which is also used in JavaServer Faces. An example of EL syntax: The value of "variable" in the object "javabean" is \${javabean.variable}.

Jakarta Server Pages - Wikipedia

As you can also see, EL is also usable in both JSP 1.2, using JSTL, and natively in JSP 2.0. (JSP 2.0 can use EL expressions directly in the page without requiring a JSP tag.) Since at the time of the publishing of this article, JSP 2.0 is still only available as a preview technology, this article will primarily review JSTL and EL which is how it is used today with JSP 1.2.

A Quick Overview of JSTL, EL and how it's used in Oracle ADF

JavaServer Pages (JSP) has built a huge following since the release of JSP 1.0 in 1999, providing Enterprise Java developers with a flexible tool for the development of dynamic web sites and web applications. While new point releases over the years, along with the introduction of the JSP Standard Tag Library (JSTL), have incrementally improved the rough areas of the first version of the JSP ...
