scholarly contributions
of Gary Marker. Twenty
scholars from Russia,
the United Kingdom,
Italy, Ukraine and the

survey of his
scholarship, and a list of

This book has been
considered by
academicians and

reciprocity and
reflexivity. Its most
remarkable feature is its
combination of formal
approaches, case studies
on individual languages
and broad typological
surveys in one volume,
showing that the
interaction of formal
approaches to grammar
and typology may lead
to new insights and
results for both fields.

Among the major issues addressed in this volume are the following: How can our current knowledge about the space and limits of variation in the relevant domain be captured in a structural typology of reciprocity? What light can such a typology shed on the facts of particular languages or groups of languages

(e.g. Austronesian)?

How can recent descriptive and typological insights be incorporated into a revised and more adequate version of the Binding Theory? How do verbal semantics, argument structure and reciprocal markers interact? How can we explain the pervasive patterns of ambiguity

Observable in these two domains, especially the use of the same forms both as reflexive and reciprocal markers?

What are the major sources in the historical development of reciprocal markers?

This combination of large-scale typological surveys with in-depth studies of particular languages provides new
