Covering New York, American & regional stock exchanges & international companies.

Watching the kite ascend higher into the sky, ten-year-old Raghav felt butterflies run deep down his gut, inflating his desire to fly high in a supersonic jet. His kite, entangled with another, crashed onto the ground. The flight took off smoothly from the runway of her heart, only to be hit by turbulence and thunderstorms smashing the plane into an abandoned sea full of gloominess. There he saw a lighthouse, a ray of hope. She became his lifeguard and taught him to swim through the storm. Like a guiding angel, she enlightened him towards the path of self-discovery leading to his journey to the island called " Bollywood." Raghav rode on a roller coaster encompassing love, passion, and conflicts. Hopping from one town to another in search of his purpose, he landed in the city of love and lights, Paris, where he saw the horizon, an illusion of his world merging with hers. But just like the two poles on Earth never meet, so was his destiny. On one side, he had Diya whom he could never get, and on the other side was Niharika whom he could never lose, and in the midst of all the chaos, he found his treasure. Come along with him to discover his hidden treasure. Who knows! You might find yours too.

Owner's manual for Lastec 721XR mower

This book focuses on the human and societal aspects of sustainable development. Three major perspectives are considered: governance and its influence on sustainable development; urban environments and their broader human and environmental impacts; and disaster management. Each of these elements is critical in considering the current and prospective development of societies towards a sustainable future in which human security is guaranteed. This 2-volume set discusses a wide range of topics concerning sustainability and human security in Asia, particularly South East Asia. The individual chapters have been contributed by authors from various fields, and due to the breadth of the material are separated into two thematic volumes. The set offers a valuable resource for professionals and researchers in the urban planning industry, postgraduates, policymakers, government officials and natural resources managers. In addition, it can be used in courses on Environmental Engineering, Agriculture and Forestry, Public Policy and Earth Science.
