~~ATSG 5R110W~~

The 5R110W is loosely described as a redesign of Ford's 4R100 automatic transmission. The 5R110W "TorqShift" transmission was introduced alongside the 6.0L Power Stroke diesel for the 2003 model year - by all means, the TorqShift is a diesel specific transmission and closely integrated into the function of the engine.

~~—Global Transmission Parts~~

The 5-speed automatic transmission 5R110W was released in 2003. This transmission was mainly intended for all-wheel drive pick-ups and powerful off-road vehicles produced by Ford. This transmission turned out to be quite popular. It had been produced for 10 years before being replaced by the fully automatic 6 speed transmission.
