INJkon 01/4.0/ Manual Page 6 of 93

(B) INTRODUCTION INJkon is a complete proven & reliable control system for Injection Molding Machine. System consists of three units. (1) Display unit (2) Input/Output drivers (3) C.V.T. (Optional)/Transformer (1) Operating Panel: This is small lightweight Display unit with soft touch keypad & TFT colour screen.

Manual Injection Molding Machine at
Rs 150000/piece ...

The injection molding machine consists of the injection unit and the clamping unit, and their features are described below.

1. Injection unit

1. Injection capacity The proper injection capacity is found from the relationship of the molding machine capacity for the weight of 1 shot as shown in Figure 1-1-2. It is necessary

to select the molding machine that satisfies the capacity of the shaded area.

CONTENTS 1. Injection Molding Machine

The injection molding press is a microprocessor-controlled unit capable of automated mold setup and real-time monitoring of the molding process. Part of the real-time monitoring includes continuously tracking the position of the moving platen with respect to the stationary platen using a linear position transducer.

Here is another larger home size
benchtop injection molding machine.
You can use it to make small and large
parts for prototypes or short runs.
Plastic is compressed from the top
with a hydraulic ram instead of a
manual handle. There is also a
digitally controlled temperature
controller, and internal plasticizer for
quick color changes.

Different machine types can fit in different spaces. Depending on your space requirements, there is a machine for you. The desktop injection molding machines are small injection molding machines and will fit on top of a desk. It is better for smaller spaces and smaller runs of molds. The benchtop injection molding machine is a large stand-alone machine that needs more space to function but can do larger runs.
