In 2074, while attending the Hanover School for Expecting Teen Mothers aboard an earth-orbiting spaceship, 16-year-old Elvie finds herself in the middle of an alien race war and makes a startling discovery about her pregnancy.

In 2074, while attending the Hanover School for Expecting Teen Mothers aboard an earth-orbiting spaceship, 16-year-old Elvie finds herself in the middle of an alien race war and makes a startling discovery about her pregnancy.

In this witty, adventurous sequel to Mothership, Elvie Nara is back on earth—but her life (including her new baby) is still pretty out there! " Irreverent humor makes this work of science fiction a comic treat " (VOYA). Pregnancy was pretty rough for Elvie Nara, what with the morning sickness, constant food cravings, and the alien race war she found herself in the middle of. But if she thought giving birth to an extraterrestrial ' s baby would be the hard part, she was sorely mistaken. After Elvie ' s baby is not what was expected, the Almiri completely freak out. Suddenly Elvie ' s supposed allies have shipped her—along with her father, her best friend, Ducky, and her maybe-boyfriend, boneheaded Almiri commando Cole Archer—off to a remote " retention facility " (aka alien jail) in Antarctica. Talk about cold. But things really get complicated when a new group of hybrid aliens arrive with information that sends Elvie ' s world spinning. Before long, Elvie is trekking across the bottom of the Earth with a band of friends and frenemies to uncover the secrets of her own origin. Will Elvie ever be able to convince the Almiri that a conspiracy to conquer the planet is a greater threat than a sixteen-year-old girl and a newborn who won ' t stop crying?

Teen mom Elvie Nara searches the universe after her daughter has been kidnapped.

One of Fuller ' s most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide " spaceship earth " toward a sustainable future. Description by Lars Muller Publishers, courtesy of The Estate of Buckminster Fuller

In celebration of Rosarium's fifth anniversary, publisher Bill Campbell has collected a two-volume collection of 100 science fiction, fantasy, and horror short stories from around the world. Like space and the future, Sunspot Jungle has no boundaries and celebrates the wide varieties and possibilities that this genre represents with some of the most notable names in the field.

From the award-winning and New York Times bestselling author of Once and for All The world is a terrible place not to have a best friend. Scarlett was always the strong one. Halley was always content to follow in her wake. Then Scarlett ' s boyfriend died, and Scarlett learned that she was pregnant. Now Halley has to find the strength to take the lead and help Scarlett get through it. Because true friendship is a promise you keep forever. \* " Dessen has written a powerful, polished story. " —School Library Journal, starred review Sarah Dessen is the winner of the Margaret A. Edwards Award for her contributions to YA literature, as well as the Romantic Times Career Achievement Award. Books by Sarah Dessen: That Summer Someone Like You Keeping the Moon Dreamland This Lullaby The Truth About Forever Just Listen Lock and Key Along for the Ride What Happened to Goodbye The Moon and More Saint Anything Once and for All

In 2074, while attending the Hanover School for Expecting Teen Mothers aboard an earth-orbiting spaceship, sixteen-year-old Elvie finds herself in the middle of an alien race war and makes a startling discovery about her pregnancy.

One of the world ' s leading scientists explains why—and how—the search for intelligent life beyond Earth should be expanded. Fifty years ago, a young astronomer named Frank Drake first pointed a radio telescope at nearby stars in the hope of picking up a signal from an alien civilization. Thus began one of the boldest scientific projects in history, the Search for Extraterrestrial Intelligence (SETI). After a half-century of scanning the skies, however, astronomers have little to report but an eerie silence—eerie because many scientists are convinced that the universe is teeming with life. Physicist and astrobiologist Paul Davies has been closely involved with SETI for three decades and chairs the SETI Post-Detection Taskgroup, charged with

deciding what to do if we ' re suddenly confronted with evidence of alien intelligence. He believes the search so far has fallen into an anthropocentric trap—assuming that an alien species will look, think, and behave much like us. In this provocative book Davies refocuses the search, challenging existing ideas of what form an alien intelligence might take, how it might try to communicate with us, and how we should respond if it does.

Philip K. Dick Award Finalist: A ragtag crew discovers alien technology that could change the fate of humanity—or awaken an ancient evil and destroy all life in the galaxy The shady crew of the White Raven run freight and salvage at the fringes of our solar system. They discover the wreck of a centuries-old exploration vessel floating light years away from its intended destination and revive its sole occupant, who wakes with news of First Alien Contact. When the crew informs her that humanity has alien allies already, she reveals that these are very different extra-terrestrials—and the gifts they bestowed on her could kill all humanity, or take it out to the most distant stars. File Under: Science Fiction [ Adrift | Liar Liar | Golden Spiders | Bridge the Void ]
