The N18 adds a small heat shield over the turbo oil pipe to help mitigate any coking in the line. The turbo intake pipe in the N18 is rigid, as opposed to the flexible pipe in the N14. The noisemaker is eliminated in the N18. The N18 intake airbox base is slightly different (the JCW intake won't fit because the mounting screws don't line up).

– we believe that this new letter is specific to the N18 engine that came with the LCI. That said the N14 has also been prone to some of these failures. What is Causing These Turbos to Fail? The turbo oil line is what often will fail initially. This makes it almost impossible for the system to feed the correct amount of oil to the turbo.
