Programming in Lua is targeted at people with some programming background, but does not assume any prior knowledge about Lua or other scripting languages. This Fourth Edition updates the book to Lua 5.3 and marks a complete reorganization of the text. Building on his many years of experience teaching Lua, Roberto has restructured the book to present the material in a growing order of complexity, allowing the reader to better absorb the character of the language.

Programming in Lua, fourth edition: 9788590379867 ...

Programming in Lua is the official book about the language, giving a solid base for any programmer who wants to use Lua. Authored by Roberto Ierusalimschy, the chief architect of the language, it covers all aspects of Lua 5---from the basics to its API with C---explaining how to make good use of its features and giving numerous code examples.

This book is a detailed and authoritative introduction to all aspects of Lua programming written by Lua's chief architect. Programming in Lua provides a solid base to any programmer who wants to use Lua.

## Programming in Lua

Lua gives the final shape of the application, which will probably change a lot during the life cycle of the product. We can use Lua not only to glue components, but also to adapt and reshape them, and to create completely new components. Of course, Lua is not the only scripting language around. There are other languages that you can use for

4 – Statements. Lua supports an almost conventional set of statements, similar to those in C or Pascal. The conventional statements include assignment, control structures, and procedure calls. Lua also supports some not so conventional statements, such as multiple assignments and local variable declarations. Copyright © 2003–2004 Roberto Ierusalimschy.
