This book is very well written until the section on many electron atoms and molecules, starting from the helium atom.

I had written a review of the 4th edition, published in International Journal of Quantum Chemistry, vol. 43, 439-441 (1992). This 5th edition is about 100 pages longer than the 4th one. All the new material it contains is clearly listed in the preface. I still highly recommend this book.
