This book is an illustrated guide to assistive technologies and devices (AT/AD). It chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. In general, AT can include mobility devices such as walkers and wheelchairs, as well as hardware, software, and peripherals that assist people with disabilities in accessing computers or other information technologies. Advanced AT has coincided with the advent of personal electronic devices that could be customized for use, such as computers and smart phones. For people with disabilities, AT includes simple gadgets for the home and office, electronic gadgets and complex computer systems for the workplace, mobility aids and accessible vans for getting around and modified equipment for lifestyle needs, such as talking ATMs and strobe light alarm systems. This book empowers people with disabilities to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

This books provides content that arms clinicians with the core knowledge and competencies necessary to be effective informatics leaders in health care organizations. The content is drawn from the areas recognized by the American Council on Graduate Medical Education (ACGME) as necessary to prepare physicians to become Board Certified in Clinical Informatics. Clinical informaticians transform health care by analyzing, designing, selecting, implementing, managing, and evaluating information and communication technologies (ICT) that enhance individual and population health outcomes, improve patient care processes, and strengthen the clinician-patient relationship. As the specialty grows, the content in this book covers areas useful to nurses, pharmacists, and information science graduate students in clinical/health informatics programs. These core competencies for clinical informatics are needed by all those who lead and manage ICT in health organizations, and there are likely to be future professional certifications that require the content in this text.

If the projects you manage don't go as smoothly as you'd like, 97 Things Every Project Manager Should Know offers knowledge that's priceless, gained through years of trial and error. This illuminating book contains 97 short and extremely practical tips -- whether you're dealing with software or non-IT projects -- from some of the world's most experienced project managers and software developers. You'll learn how these professionals have dealt with everything from managing teams to handling project stakeholders to runaway meetings and more. While this book highlights software projects, its wise axioms contain project management principles applicable to projects of all types in any industry. You can read the book end to end or browse to find topics that are of particular relevance to you. 97 Things Every Project Manager Should Know is both a useful reference and a source of inspiration. Among the 97 practical tips: "Clever Code Is Hard to Maintain...and Maintenance Is Everything" -- David Wood, Partner, Zepheira "Every Project Manager Is a Contract Administrator" -- Fabio Teixeira de Melo, Planning Manager, Construtora Norberto Odebrecht "Can Earned Value and Velocity Coexist on Reports?" -- Barbee Davis, President, Davis Consulting "How Do You Define "Finished"?" -- Brian Sam-Bodden, author, software architect "The Best People to Create the Estimates Are the Ones Who Do the Work" -- Joe Zenevitch, Senior Project Manager, ThoughtWorks "How to Spot a Good IT Developer" -- James Graham, independent management consultant "One Deliverable, One Person" -- Alan Greenblatt, CEO, Sciova

Cardiac Pacing: An Illustrated Introduction will provide an introduction to all those who have or who are developing an interest in cardiac pacing. At a time in the UK when pacing is being devolved from specialist tertiary cardiac centres to smaller district general hospitals and in the USA where pacemaker implantation is no longer the responsibility of the surgeon and in the domain of cardiologists, there is a need for a text which offers a guide to pacing issues to be used alongside a comprehensive practical training programme in an experienced pacing centre

Hearing Aid Compatibility Standards (US Federal Communications Commission Regulation) (FCC) (2018 Edition) The Law Library presents the complete text of the Hearing Aid Compatibility Standards (US Federal Communications Commission Regulation) (FCC) (2018 Edition). Updated as of May 29, 2018 The Commission amends its hearing aid compatibility (HAC) rules to enhance equal access to the national telecommunications network by people with hearing loss and implement the Twenty-First Century Communications and Video Accessibility Act. The changes incorporate by reference a revised technical standard for volume control for wireline telephones, expand the scope of the wireline HAC rules, add a volume control requirement for wireless handsets, and eliminate an outdated wireless technical standard. This book contains: - The complete text of the Hearing Aid Compatibility Standards (US Federal Communications Commission Regulation) (FCC) (2018 Edition) - A table of contents with the page number of each section
