The Gods and Their Flying Machines The major attribute of the gods is that they could fly. Here are a few clues: - When flying Quetzalcoatl appeared to the ancient Mexicans as a feathered serpent: "first it flies, quite high up, well up it goes, and it just descends". And when it flies or descends a great wind blows.

The Technology of the Gods

The Technology of God is a science fiction metaphysical thriller, based on the real life theory of award-winning physicist Nassim Hamein. This unification theory is rocking the world of science and religion as it offers a complete scientific understanding of both the physical and spiritual expressions of creation.

## Technology Of The Gods Courses - XpCourse

Man was created in the image of the gods. Many ancient peoples believed that their technology was a result of gifts from the gods. The gods would occasionally come down to Earth in times of great need and assist humankind with various kinds of knowledge.

Technology of the Gods lays out the mind-bending evidence that long-lost civilizations had attained and even exceeded our "modern" level of advancement. Westerners have been taught that humankind has progressed along a straight-line path from the primitive past to the proficient present, but the hard, fast evidence (literally written in stone!) proves that the ancients had technologies we cannot even replicate today.

Traces the story of how ancient cultures envisioned artificial life, automata, self-moving devices and human enhancements, sharing insights into how the mythologies of the past related to and shaped ancient machine innovations.

An analysis of Heidegger's philosophy of technology.

David Hatcher Childress, popular Lost Cities author and star of the History Channel's long-running show Ancient Aliens, takes us to the mysterious ruins in the mountains of Peru and Bolivia in search of ancient technology and the secrets of megalith building. In his new book, packed with photos and diagrams, Childress examines the amazing stonecutting at Puma Punku, a site neighboring the ancient ruins of Tiwanaku near Lake Titicaca in Bolivia. He looks at whether the so-called "Inca walls"-found in Cuzco and at other sites such as Sacsayhuaman, Ollantaytambo and Machu Picchu-were really made by the Incas. The evidence seems to support the idea that they were actually constructed by a far older culture. Childress examines the megalithic construction and underground chambers of Chavin in the Cordillera Blanca of Peru, possibly the oldest megalithic site in South America. He also speculates on the existence of a sunken city in Lake Titicaca and reveals new evidence that the Sumerians may have arrived in South America over 4,000 years ago. Childress demonstrates that the use of "keystone cuts" with metal clamps poured into them to secure megalithic construction was an advanced technology used all over the world, from the Andes

to Egypt, Greece and Southeast Asia. He maintains that only power tools could have made the intricate articulation and drill holes found in extremely hard granite and basalt blocks in Bolivia and Peru, and that the megalith builders had to have had advanced methods for moving and stacking gigantic blocks of stone, some weighing over 100 tons. The incredible high-tech world of South America is illuminated in the informative and breezy style for which Childress has always been known. Chapters in the book include: The Lost World of South America; The Enigma of Ancient Technology; Ancient Technology at Tiwanaku and Puma Punku; The Sumerian Mining Complex at Tiwanaku; Mysteries of Lake Titicaca and the Towers; Ancient Technology in Cuzco; The Megaliths of Ollantaytambo; Did the Incas Build Machu Picchu?; and more!

**\*\*Winner of the Transmission Prize 2019\*\*** THE OLD GODS ARE DYING. Giant corporations collapse overnight. Newspapers are being swallowed. Stock prices plummet with a tweet. NEW IDOLS ARE RISING IN THEIR PLACE. More crime now happens online than offline. Facebook has grown bigger than any state, bots battle elections, coders write policy, and algorithms shape our lives in more ways than we can imagine. The Death of the Gods is an exploration of power in the digital age, and a journey in search of the new centres of control. From a cyber-crime raid in British suburbia to the engine rooms of Silicon Valley, pioneering technology researcher Carl Miller traces how power is being transformed, fought over, lost and won. □A timely and incisive book that grapples with some of the most significant issues of our time.□ Wired 'Uncovers the fascinating and often hidden characters that are changing the world. Essential reading.' Jamie Bartlett, author of The People vs Tech □A magisterial guide to the impact of the digital revolution on our institutions and our lives.□ Anthony Giddens

This book takes us beyond Childress's previous books This amazing book on an unusual voyage into the world ancient flying vehicles, ancient legends of flight and the mysterious power system of Atlantis. Taking us from ancient texts in a centuries old library in India (The Royal Baroda Library in Mysore India) to diagrams of mercury vortex engines and power broadcasting crystals of Atlantis, this will fascinate and amaze! Richly illustrated, and packed with evidence that Atlantis not only existed system more sophisticated than ours of today. Topics: The Ramayana and the amazing vimanas of ancient India; Atlantis and its crystal power towers that broadcast energy; Inventor Nikola Tesla's nearly identical system of power transmission; How gyros with electrified gas or liquids anti-gravity effect; Mercury Proton Gyros and mercury vortex propulsion; The Crystal Towers that broadcast energy to the lost continent of Atlantis; How these incredible power stations may still exist today; The Earth as a giant power plant.

The Technology of God is a science fiction metaphysical thriller, based on the real life theory of award-winning physicist Nassim Hamein. This unification theory is rocking the world of science and religion as it offers a complete scientific understanding of both the physical and spiritual expressions of creation. Aleya Annaton, Emissary of Hamein's Resonance Project Foundation, has masterfully woven the elements of this profound new understanding of our universe into a thrilling romantic adventure. The story is set in a near future America, controlled by an extreme fundamentalist religious faction that has taken over the government. Physicist Dr. Alex Harmon, along with his colleague and lover, the beautiful Sydney Stewart, are seeking a theory that would unlock the secrets of creation... a forbidden subject under the new religious law. Believing the physics of space-time was encoded into the world's religious traditions, they set out to decipher clues passed down in manuscripts, secret societies, and monuments around the world. When they discover the universe works in ways contrary to mainstream science as well as the prevailing religious doctrine, they are thrust into the crosshairs of the

tyrannical leader of the new religious state. As they set out to build a technology to access a mysterious realm they believe underlies all of physical creation, they must negotiate a world of political intrigue, ancient initiation, love, betrayal and contact with Beings from other worlds. What they find at the end of their quest is no less than the answers to the most intriguing questions man has pondered since he first gazed at the stars.

A unique study of the engineering and tools used to create Egyptian monuments — Presents a stone-by-stone analysis of key Egyptian monuments, including the statues of Ramses II and the tunnels of the Serapeum — Reveals that highly refined tools and mega-machines were used in ancient Egypt From the pyramids in the north to the temples in the south, ancient artisans left their marks all over Egypt, unique marks that reveal craftsmanship we would be hard pressed to duplicate today. Drawing together the results of more than 30 years of research and nine field study journeys to Egypt, Christopher Dunn presents a stunning stone-by-stone analysis of key Egyptian monuments, including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet. His modern-day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments in prehistoric times. Using modern digital photography, computer-aided design software, and metrology instruments, Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them. His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other, and his examination of the mysterious underground tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet. Providing never-before-seen evidence in the form of more than 280 photographs, Dunn's research shows that while absent from the archaeological record, highly refined tools, techniques, and even mega-machines must have been used in ancient Egypt.

"A Wall Street Journal columnist for "Weekend Confidential" explores the hubris and ambition of Silicon Valley innovators who are changing the world, tracing the stories of three upstarts who left promising college educations in favor of developing billion-dollar ideas"--NoveList.

When Chariots of the Gods was published 50 years ago, it began a worldwide change in humanity's view of the cosmos. In an era of the military space race, Erich von Däniken boldly proclaimed that Earth had been visited by more advanced beings early in our history. But prescientific man had no concept of space ships, so he called their vehicles "chariots," and those driving the chariots became "gods." Over the next five decades, von Däniken's more than 40 books built an ever-stronger case for Earth being visited by extraterrestrial visitors. And Chariots became an international best seller, with 30 million copies sold in more than two dozen languages. Also during that time, the case for ET visitations millennia ago was being reexamined by contemporary UFO researchers, who found evidence of modern visitations. And von Däniken expanded his perspective to encompass the present. Now, he presents his long-awaited sequel to Chariots of the Gods, proclaiming that the gods never left us with all-new material to show that ancient aliens are still with us. The Gods Never Left Us contends that recent advancements in biotechnology, astrophysics, engineering, and artificial intelligence not only give us a fresh perspective on his ancient astronaut theory but actually validates it. We are—as a race—embarking on the exact same trajectory of our own interplanetary colonization, just as von Däniken suggested Earth itself was colonized. ETs are definitely at work today. And that affects all of us. Why do they do what they do? What could an extraterrestrial species possibly gain from observing us in the same way we look at ants? What have these strangers wanted for the past thousands of years? Can't they leave us alone? And what makes it so difficult for us to acknowledge the existence of these

extraterrestrials? That is what this book deals with. "Erich's newest book is a fascination journey from the ancient past into the present with a plethora of scientific evidence and documented research. As always, he adds his own "to the point" take on it all. Readers may also like that his newest work moves in a slightly different direction from his past books. A thoroughly enlightening and enjoyable Read." —Bruce Cunningham, Director, Ancient Mysteries International LLC & Publisher of Advanced Archaeology Review magazine
