That was when Christopher Columbus, or more probably his lookout Rodrigo de Triana, first saw the New World. This discovery would initiate a revolutionary chain of events, David Wootton argues: the invention of science had begun. ... Wootton's book tells, in gripping and convincing detail, how these big changes happened. From Columbus he traces a story whose major actors include Nicolaus Copernicus, Tycho Brahe, Galileo Galilei, Johannes Kepler, Evangelista Torricelli, William Gilbert, René ...

The Invention of Science | by David Wootton

The Invention of Science by David Wootton is a dense, thought-provoking, and encyclopedic account of the Scientific Revolution. The book is an intellectual history, focusing mainly on the mental paradigm shift that the Revolution brought to Western Civilization. How man thinks about the natural world post-Revolution is not the same as how man thought before it, and this shift in how we conceive the world has been so complete that we easily take it for granted.
