Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety. Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29

percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per vehicle. The book focuses on fuel consumption--the amount of fuel consumed in a given driving distance--because energy savings are directly related to the amount of fuel used. In contrast, fuel economy measures how far a vehicle will travel with a gallon of fuel. Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions, the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information.

Jim Davis, through stories of his remarkable career as U.S. Naval officer, international trial lawyer and Federal trial judge, provides rare insight and humor to exotic happenings on the high seas and in America's courtrooms. All stems from his improbable youthful achievements . . . appointment to the U.S. Naval Academy faculty at age 23 and to the Federal bench in Washington, D.C. at age 32, youngest ever to the U.S. Court of Claims. He tells of chasing Soviet nuclear submarines from New York to the North Sea, learning the Navy's ways while working with fellow-officer Ross Perot (America's computer wunderkind in the late 1950s), navigating the St. Lawrence seaway in 1957 on an aircraft carrier, the first and largest ship to do so, and entering Havana, Cuba in 1957 under threat of Castro's expanding revolution. In the courtroom, he tangled with the CIA over recovery of a Soviet submarine from the Pacific Ocean floor, prevented China from exporting illegally millions of TV sets to the U.S. after stealing U.S. patents, protected Texas Instruments' multi-billion dollar position in computer chip production from invasion by Japan and Korea, and thwarted piracy by Mexican and Chinese pirates of National Geographic Society's world famous yellow-bordered Geographic magazine. As trial judge, he decided a \$211 million patent case, second largest in U.S. history, and decided what Time Magazine called the "most significant copyright case of the 20th century," copyright's struggle with the Xerox machine. And much more. A great read!

Getting a Rover K-Series engine properly up and running can be a difficult task, but ultimately the result is always worthwhile. Illustrated with over 300 photographs, Rover K-Series Engine - Maintenance, Repair and Modification is a practical guide to keeping these unique engines in fine working order. The most well-known issue with the K-Series is the head gasket, and this book demonstrates how to identify common faults, before giving practical advice on how best to solve them. Step-by-step guidance on all aspects of long-term engine maintenance is provided, in addition to the improvements required to prevent further problems. A K-Series engine is then stripped down to examine its clever and interesting structure, and is rebuilt with improvements. Authors of over twenty automotive books and countless articles in assorted motoring magazines, Iain Ayre and Rob Hawkins have combined their knowledge to bring you this book on the Rover K-Series engine, which is fully illustrated with 356 colour photographs.
