This new edition continues to be the classic core textbook for veterinary nursing students and a useful resource for qualified veterinary nurses. The edition has been revised and updated throughout and provides information covering the Day 1 Competencies (DICs) and Day 1 Skills (DISs), as set by the Royal College of Veterinary Surgeons (RCVS), and which every veterinary nurse graduate is expected to meet. This edition focuses on dogs, cats, small mammals, birds and reptiles. Learning objective boxes, references and further reading, and self-assessment questions accompany each chapter.

Veterinary Nursing replaces the well known and trusted Jones's Animal Nursing, 5th Edition. The change in name reflects the current professional title of veterinary nurse and accurately describes a book devoted to the nursing and care of small animals. Dick Lane, who has edited previous editions of Jones's is this time joined by Barbara Cooper, herself a veterinary nurse and former president of the BVNA. The content of the book has been broadened to reflect the wider role of veterinary nurses and the more demanding syllabus that they must complete.

A comprehensive guide to the care and nursing of small animals for all veterinary nurses in training and practice.

The Complete Textbook of Veterinary Nursing has established itself as a recommended standard text for all veterinary nurses. It is designed both to satisfy the requirements of the syllabus studied by all student veterinary nurses and to provide a wide range of information for qualified nurses working in veterinary practice. This new second edition has been updated and revised to align it perfectly with the needs of a new generation of students. . Comprehensive content endorsed by all leading course providers . Full colour illustrations for maximum clarity . Written by veterinary nurses for veterinary nurses . Additional online resources to maximize learning potential Improved website offers a range of film clips of essential procedures, introduced and narrated by Victoria Aspinall - plus comprehensive test-yourself questions in both study and assessment modes. All chapters revised and updated in line with changes in legislation, knowledge and current practical techniques. Brand new chapters on Ethics and Welfare, Communication and Physiotherapy. New section on Nursing Care Models to provide veterinary nurses with the necessary information to use this concept in their own practices. Dog behaviour chapter updated and revised to reflect the latest thinking about the process of domestication of the dog and its relevance to training methods. Additional photographs added throughout for enhanced understanding and clarity. Entire text accessible as an e-book with full note-making, referencing and search functionality.

The fourth edition of the Dictionary of Veterinary Nursing is a must-have, highly practical source of information for student and qualified veterinary nurses and for anyone working in animal care. Covering all companion animals, equine, poultry and exotic patients this is the only dictionary written specifically for veterinary nurses that covers all aspects of the veterinary nursing curriculum. This new edition has been thoroughly updated and expanded to ensure all the information you require can be easily accessed. Presents over 5000 concise but detailed definitions. 27 useful appendices provide a quick reference source for frequently needed data. Line diagrams aid learning and understanding. More than 250 new definitions covering new diseases, chickens, rabbits, other exotics, jurisprudence and complementary therapy. Expanded international coverage includes Australian and American diseases. Increased focus on business terms gives insight into the running of a veterinary practice. 11 new appendices including fluid therapy calculations, common fluids and their uses, rabbit and horse breeds and coat colours, vaccination schedules for chickens, urine crystals, reporting adverse drug reactions, general principles of toxic agents, poisons and toxins, quarantine regulations, action to take for lost/found animals.

The new edition of this classic core textbook has been fully updated to reflect the current syllabus, including equine content for the first time, while retaining additional useful chapters that are no longer covered in the syllabus. Each chapter includes learning objectives and self assessment questions. There are new chapters on professional responsibilities, professional development and learning. KEY FEATURES Anatomy and physiology presented in a single integrated chapter to allow easy comparison Stand-alone chapter on nursing models, with clinical application examples New chapter on professional responsibilities, regulation and ethics Up-to-date content on MRSA and PETS regulations Appendix on study skills Specially commissioned new drawings Addresses equine species as required by VN core units, including details on anatomy, handling, stabling, feeding, bandaging, radiography, reproduction and anaesthesia

Small Animal Internal Medicine for Veterinary Technicians and Nurses is the first comprehensive resource on internal medicine written for the veterinary technician. Organized by body system, each chapter discusses pertinent diseases, from clinical signs, diagnostic testing, and prevalence to treatment options and nursing considerations. Published in association with the Academy of Internal Medicine for Veterinary Technicians, this book offers both a thorough grounding in the foundations of internal medicine for students and new veterinary technicians and detailed, advanced information suitable for experienced veterinary technicians. Coverage includes an overview of neurological disorders and discussion of the surgical, emergency, and nursing considerations for each condition. This complete reference, which includes a companion website with quizzes, images, and video clips, is essential reading for veterinary technician students, practicing technicians, and those studying for the AIMVT specialty exam.

Veterinary Nursing replaces the well known and trusted Jones's Animal Nursing, 5th Edition. The change in name reflects the current professional title of veterinary nurse and accurately describes a book devoted to the nursing and care of small animals. Dick Lane, who has edited previous editions of Jones's is this time joined by Barbara Cooper, herself a veterinary nurse and former president of the BVNA. The content of the book has been broadened to reflect the wider role of veterinary nurses and the more demanding syllabus that they must complete.
